

JOSHUA WASHINGTON HUTASOIT

Jakarta, Indonesia • +62 82335805431 • joshuahutasoit809@gmail.com
• joshuahutasoit.vercel.app • github.com/G411le30

SUMMARY OF QUALIFICATIONS

- Cybersecurity enthusiast and CTF Player with a strong foundation in network defense, digital forensics, and SOC operations.
- Proficient in SIEM operations using **Wazuh** for log analysis, alert configuration, and threat detection.
- Hands-on experience with penetration testing and forensics tools: **Wireshark, Burp Suite, Nmap, and Autopsy**.
- Strong analytical skills for incident triage and vulnerability assessment in Linux and Windows environments.
- Certified Google Cybersecurity Professional with expertise in network security and system hardening.
- Proven ability to create detailed technical write-ups and security reports for complex investigations.

AREAS OF EXPERTISE

- **Security Operations** – Wazuh SIEM, Incident Triage, Log Correlation, Threat Detection
- **Tools & Forensics** – Wireshark, Burp Suite, Metasploit, Nmap, Autopsy, OpenVAS
- **Systems Security** – Linux/Windows Hardening, Network Defense, VMware
- **Technical Research** – CTF Write-ups, Vulnerability Research, Security Automation

EDUCATION

Bachelor of Computer Science (Informatics Engineering)	August 2023 – Present
Universitas Brawijaya, Malang, Indonesia	GPA: 3.50
High School Diploma, Science Track	2020 – 2023
SMAK 7 Penabur, Jakarta, Indonesia	

CYBERSECURITY EXPERIENCE

Member, Poros FILKOM UB (Cybersecurity Community)	February 2025 – Present
Universitas Brawijaya	

- Active researcher and competitor in national and international CTF competitions.
- Collaborated on vulnerability assessments and network defense drills.

AWS re/Start Bootcamp Graduate	October 2025 – December 2025
Orbit Future Academy	

- Applied the **AWS Shared Responsibility Model** to secure cloud infrastructures.
- Implemented strict IAM policies and system hardening for cloud-based resources.

INKOR SMT Program Indonesia	July 2025 – August 2025
Security Manpower Training (SMT)	

- Completed a cybersecurity bootcamp featuring hands-on labs and real-world security exercises.
- Gained experience in vulnerability assessment methodologies and foundational penetration testing.
- Developed strong technical documentation and reporting skills to communicate security findings.

Practical Basic Penetration Testing	May 2025 – June 2025
PT Linuxhackingid Cyber Security	

- Focused on penetration testing fundamentals and security assessment methodologies in virtualized labs.
- Performed reconnaissance and information gathering using OSINT, Google Dorking, and network discovery tools.
- Conducted network assessments using **Nmap, Zenmap, and OpenVAS**.
- Explored post-exploitation concepts including privilege escalation and persistence.

SOC Analyst Bootcamp

March 2025

JadiHacker.id

- Performed alert triage and investigation in a simulated SOC environment using Wazuh.
- Configured custom detection rules and log collection for multi-platform systems.
- Documented incident response procedures and remediation steps for simulated attacks.

CERTIFICATIONS & ACHIEVEMENTS

- | | |
|---|---------------|
| • Google Cybersecurity Professional Certificate | June 2026 |
| • AWS Certified Cloud Practitioner | February 2026 |
| • AWS re/Start Graduate | December 2025 |
| • Introduction to SOC – JadiHacker.id | March 2025 |

TECHNICAL RESOURCES

- **Technical Blog:** 30-day-cyber-challenge.blogspot.com – Detailed CTF write-ups.
- **Portfolio Website:** joshuahutasoit.vercel.app – Security research showcase.
